Expected 2025

Columbia University

PER-IO Graduate Student Visitor, Department of Economics

New York, NY 2023

University of California, San Diego

B.S. - Mathematics & Economics; Summa Cum Laude

La Jolla, CA 2020

#### WORKING PAPERS

## Escape the Heat: The Dynamics of Migration as Adaptation to Climate Change

To understand the effectiveness of migration in limiting exposure to future climate damages, I specify and estimate a dynamic lifecycle model of migration within Mexico. I combine this with a non-stationary and spatially-varying model of the climate, of which I allow for both fully-informed and naive expectations of the future progression. Estimation of the model uses a sample of life histories, covering the years 1950–2019, and follows a nested full-solution pseudo-maximum likelihood routine. I find that predicted warming under a business-as-usual climate scenario will lead to an increase in the value placed on the ability to migrate domestically of 70% across a single generation. I also use the model to understand the value of information on the climate system. I find that climate-naive individuals stand to gain an average of \$1,105 over their lifetime from obtaining correct information on the business-as-usual climate transition to aid in their adaptation decisions. This has important policy implications for the design of information campaigns to aid in climate adaptation. I further use the model to understand the different incentives that are created by the dynamic structure of policy. I find that the option value, from non-migrants, of a dynamically-available \$100 reduction in moving costs increases by 15% between the 2020 and 2038 cohorts, under business-as-usual warming.

#### PFAS-Contaminated Drinking Water Harms Infants

with Bo Guo, Wesley Howden, Ashley Langer, and Derek Lemoine In revision for Science

There is evidence of widespread human exposure to per- and polyfluoroalkyl substances (PFAS) but limited evidence of human health impacts. Using data on all New Hampshire births from 2010–2019, we show that receiving water that has flowed beneath a PFAS-contaminated site increases first-year infant mortality by 161% [95% CI: 70–251%], the chance of a birth before 28 weeks of gestational age by 120% [95% CI: 30–210%], and the chance of birthweight below 1,000 g by 152% [95% CI: 48–257%]. Extrapolating to the contiguous U.S., PFAS contamination imposes annual social costs of approximately \$8 billion. These health costs are substantially larger than the cost of removing PFAS from the public water supply.

# Presentations

2024: AERE Summer Conference, University of Arizona Econometrics Lunch

2023: AERE@OSWEET, AERE@WEAI, AZ ENREE Workshop, Columbia University IO Colloquium, Sacramento

Economics Roundtable, 2<sup>nd</sup> Summer School on the Economics of Migration

2022: CU Environmental & Resource Economics Workshop

2019: UCSD Faculty Mentor Program Symposium, UCSD Undergraduate Research Conference

#### Grants and Awards

2024: Dror Research Excellence Award, AERE Travel Scholarship, GPSC Travel Grant

2023: AEA Mentoring Program Travel Grant

2022: Steve Manos Prize for Best Second-Year Paper, GPSC Travel Grant

2020: Phi Beta Kappa

#### RESEARCH EXPERIENCE

Research Assistant

Prof. Ashley Langer

Research Assistant

Prof. Derek Lemoine

Research Assistant Prof. Philip Roeder University of Arizona Spring 2022 - Present

University of Arizona Spring 2022 - Fall 2023

University of California, San Diego  $Spring \ 2019$ 

# Teaching

#### Instructor of Record

Microeconomic Analysis for Business Decisions - Spring 2025 (Online)

Macroeconomic and Global Institutions and Policy - Summer 2024 (Online)

Basic Economic Issues - Summer 2023 (In-Person)

## Teaching Assistant

Environmental Economics - Spring 2024

Economics of Sports - Spring 2023

Mathematical Economics (PhD) - Fall 2021, Fall 2022

Math Camp (PhD) - Summer 2022

Economics of Strategy - Fall 2020, Spring 2021

Climate Science & Economics: How Should Policy Control Warming? - Fall 2021

Basic Economic Issues - Fall 2020

#### SKILLS SUMMARY

Programming Languages: Julia, Python, R

(Non-Programming) Languages: English (Native), Spanish (Conversational)
